

Toms River Locksmith Celebrates 30th Anniversary

2011 marks the 30th year Toms River Locksmith has been in business, serving Ocean County. Toms River resident Frank Klem started the company on June 2, 1981. He built his business on service and customer satisfaction, which proved to be the reason for his success over so many years. Frank was the sole owner until he retired to Florida in 2003.

In 2003 James Everett purchased the company following his retirement, as a Lieutenant from the Dover Township Police Department. (now Toms River Police Dept.) During Jim's 29- year career in Law Enforcement, he worked part-time with Frank for over 15 years as a Locksmith. Jim still follows the same business practices and professional work ethics established by its founder from years ago. The combination Locksmith and Criminal Justice careers have proven to be a great combination for its customers. The knowledge of crime prevention practices, coupled with professional products and installation, is what makes a safe, secure and satisfied customer.

Toms River Locksmith is a mobile locksmith servicing both residential and commercial customers. They install and repair many different types of locks and hardware. In addition, they offer deadbolt installations, re-keying locks, Security Surveys, and safe sales with installation. There are many new security products available now that were not around 30 years ago. It is a fast changing product industry, which has to be updated on a regular basis in order to provide the best safety and security ideas to the customers.

Jim is proud to carry on its company's traditions and legacy, which has proven to be the *key* to the success of ***Toms River Locksmith***. The company business and Jim are licensed by the State of New Jersey, fully insured and bonded.
